## Profile

A senior web and mobile software development professional with a broad range of experience spanning numerous private and public sector clients and industry sectors. I have developed apps for both large enterprises and startups and have a clear understanding of the app development lifecycle from ideation, development, testing and store release. I also have several years of project experience working closely with business stakeholders to deliver enterprise IT solutions.

Wide-ranging experience on projects using web and cloud technologies with AI coding assistants central to my workflow, I am currently working in senior software roles focused on full stack development and mobile applications and am seeking new opportunities to further my portfolio - https://eugenecross.co/

## Professional Certifications and IT Skills

**Front End:**
JavaScript, Typescript, HTML5, CSS3, React, NextJS, Vue, Angular, React Native, Swift, Kotlin, Java, Ionic Framework, Cordova, Capacitor, Flutter, Tailwind, Redux, RxJS, MobX, ngRx, Web Components, ChartJS, Storybook, StencilJS, Python, Bash, Jest, Fastlane, Git, Google Analytics.

**AI Tools:**
Codex / ChatGPT, Claude Code, Github Copilot

**Certifications**
- Google Cloud: Associate Cloud Engineer https://bit.ly/3TLKM6A
- ITIL v2 Foundation

## Employment History

**Senior Mobile Developer** **May 2025 - November 2026**
**SRT Marine, Bath & NE Somerset (Remote Contract)**
- Brought in as part of a team to release a cross platform app connecting to a marine environment VHF radio.
- Tech stack: VueJS and Capacitor app on iOS and Android. WearOS and WatchOS companion applications built using Kotlin and SwiftUI respectively.
- Conducted a wide ranging refactor of the codebase and got the first version of the app launched in January 2026 and subsequent feature releases this year.

**Senior Full Stack Developer**
**MACS EU, Birmingham (Remote Contract)** **October 2024 – May 2025**
- Lead developer on a greenfield project for the Defence Infrastructure Organisation. Architected and built a React, NextJS, Express app to GDS standards hosted on AWS.

**Senior Mobile Developer**
**Work Wallet, Derby (Remote Contract)** **November 2023 – August 2024**
- Brought into upgrade the company's existing Ionic 5 / Cordova app to Ionic 7 and Capacitor and to the latest Angular framework version, alongside new feature development as required on the legacy app.

**Senior Mobile Developer**
**Aurena Tech, Austria (Remote Contract)** **October 2022 – July 2023**
- Lead mobile developer working on a business facing mobile app to digitise the auction distribution process. App built using React, Ionic & Capacitor.

**Senior Ionic Angular Developer** **July 2022 – October 2022**
**Wealth Dynamix, UK (Remote Contract)**
- Setup a PoC Ionic / Capacitor app integrating with the company's custom client relationship management CMS to be used for banking organisations to facilitate client onboarding, customer KYC and ID&V.

**Full Stack Developer, Hostcomm, UK (Remote Contract P/T)** **October 2021 – February 2026**

- Architecting and building a remote video inspection web app (React / Twilio / WebRTC / AWS Amplify / NodeJS) hosted on AWS and with a backend built on MongoDB.

**Senior Mobile Engineer** **March 2021 – July 2022**
**RocketLawyer, London, UK (Remote Contract)**

- Brought in to upgrade and improve an existing Angular Ionic / Cordova app, improved the star rating to 4.8 in first 3 months.
- Setup the app development and release process from scratch including git releases, tagging and versioning, PR templates, build scripts and app store releases. I also assisted with recruitment for the team.
- Setup the app scaffold and contributed features to the next generation React Native app.

**Senior Software Engineer – Mobile Technology** **September 2020 – March 2021**
**Cambridge Cognition, Cambridge, UK (Remote Contract)**

- Hybrid app development using Typescript, React, Ionic and Capacitor. Apps integrated with wearables (Apple Watch) and the organisations' API platform for the delivery of clinical trials.

**Mobile React Developer (Remote Contract P/T)** **May 2019 – July 2020**
**Brenger, Amsterdam, Netherlands**

- Conversion of an existing React web application into a mobile app using Ionic and Capacitor.
- Integration of the native geolocation plugin to obtain device data and updating it back to an API to track delivery drivers' whereabouts.
- Implementing the CI build process for iOS and Android on Gitlab CI and managing the App Store release processes.

**Senior Hybrid Mobile Developer / Web Developer (Remote Contract)** **February 2017 – September 2020**
**Pfizer, London, UK**

- Mobile architecture and development using cutting edge web technologies as part of the distributed Cloud Apps Team within Pfizer Business Technology.
- Lead developer on the first hybrid mobile application to be successfully delivered into production by the team; a patient focused metastatic breast cancer care app for the Argentinian market. App had integrations into a custom middleware layer built on PHP and noSQL backend build on Couchbase as well as Drupal CMSs and graphs built with ChartJS.
- Lead developer on a flagship quit smoking app for the Australian market. App features included gamification elements such as unlocking badges, information content including video / audio and a social newsfeed with the ability to react to other app users to encourage other app users on their quit smoking journey.
- I was also a lead front end developer customising a third-party cloud authentication solution (Janrain) for health care professionals rolled out to several global markets.
- Contributed to the teams' legacy Angular component library and new Stencil JS web component based library with a calendar UI component and HTML5 audio/video player. Presented project showcases at the team conference. Involved in team architecture decisions and roadmaps for upcoming apps and project pipelines.

**Mobile Solution Architect (Contract)** **March 2015 – January 2017**
**KeolisAmey Docklands, London, UK**

- Member of mobile solution team, responsible for design and development of enterprise apps, primarily to be used in conjunction with Maximo 7.5 as part the new asset management solution for the franchise.
- Hybrid app development using the IBM MobileFirst platform and the Ionic Framework. Responsible for the design and build from the ground up of the Work Management apps, a core aspect of the customer's business processes.
- Separately project managed a 3rd party contractor, designing a Maximo and mobile solution which enabled their cleaning SLAs to be adhered to more effectively, replacing their existing paper-based processes.

**Senior Maximo Consultant (Contract)** **January 2013 – March 2015**
**London Underground (previously Tubelines Ltd), London, UK**

- Team member on a major business transformation programme consolidating the legacy Maximo 5.2 and MXES environments to Maximo 7.5 for the Jubilee, Northern and Piccadilly line operations and maintenance organisation.

**Maximo Consultant (Contract)** **January 2011 – December 2012**
**SABMiller, Woking and Reading, UK**

- Employed on a contract basis for the implementation of two new Maximo 7.2.1 solutions. Initial project was the delivery of a new federated Service Desk for the global business with integration to regional Service Desks for the South Africa / LatAm / European businesses and other 3rd party service providers. The second project is the separate implementation of a European wide Service Desk

**Maximo Consultant (Contract)** **August 2010 – January 2011**
**EADS Astrium, Portsmouth, UK**

- SME and responsible for design and implementation of Configuration and Change Management business process.

**Consultant, Pirean Ltd, London, UK** **February 2007 - August 2010**

- Technical consultant on various IAM and ITSM projects for clients in the UK such as Barclays, DEFRA and Aviva

**Systems Analyst, Atkins Corporate and Retail Asset Management, Leeds, UK** **July 2004 – June 2006**

## Summary of Education:

**Leeds Metropolitan University, UK** **September 2001 – June 2004**
**Bsc (Hons) Computing – Systems Analysis and Design**
Upper Second Class Honours [2:1]
